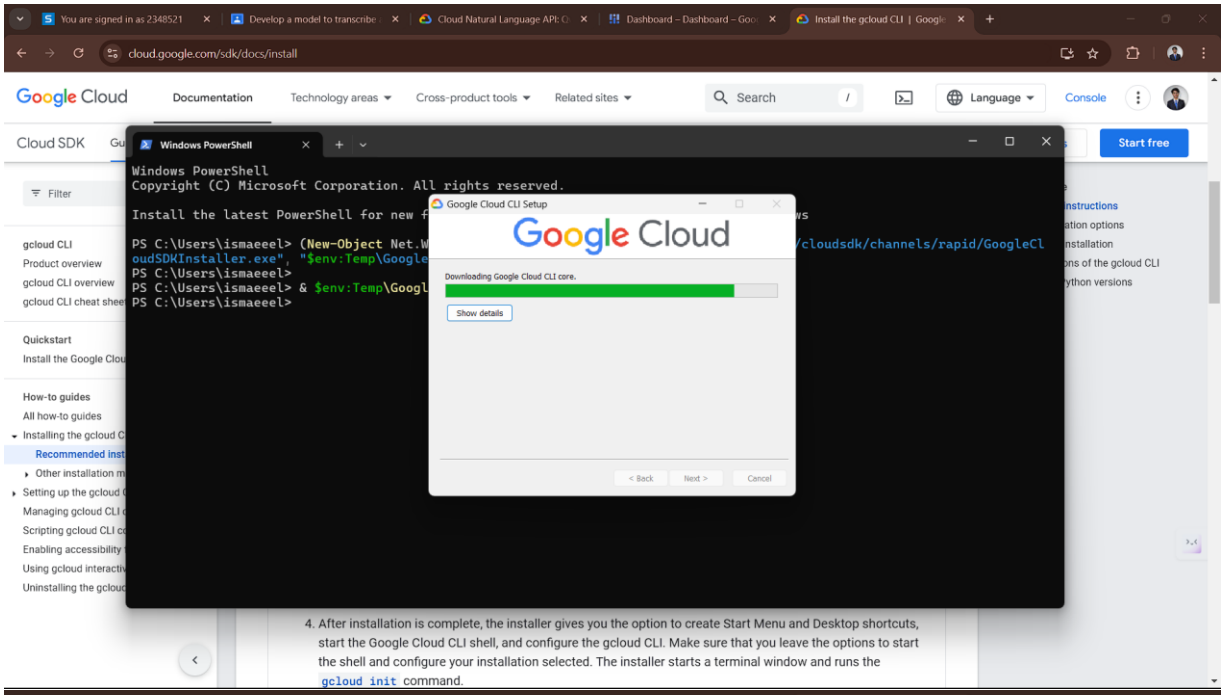
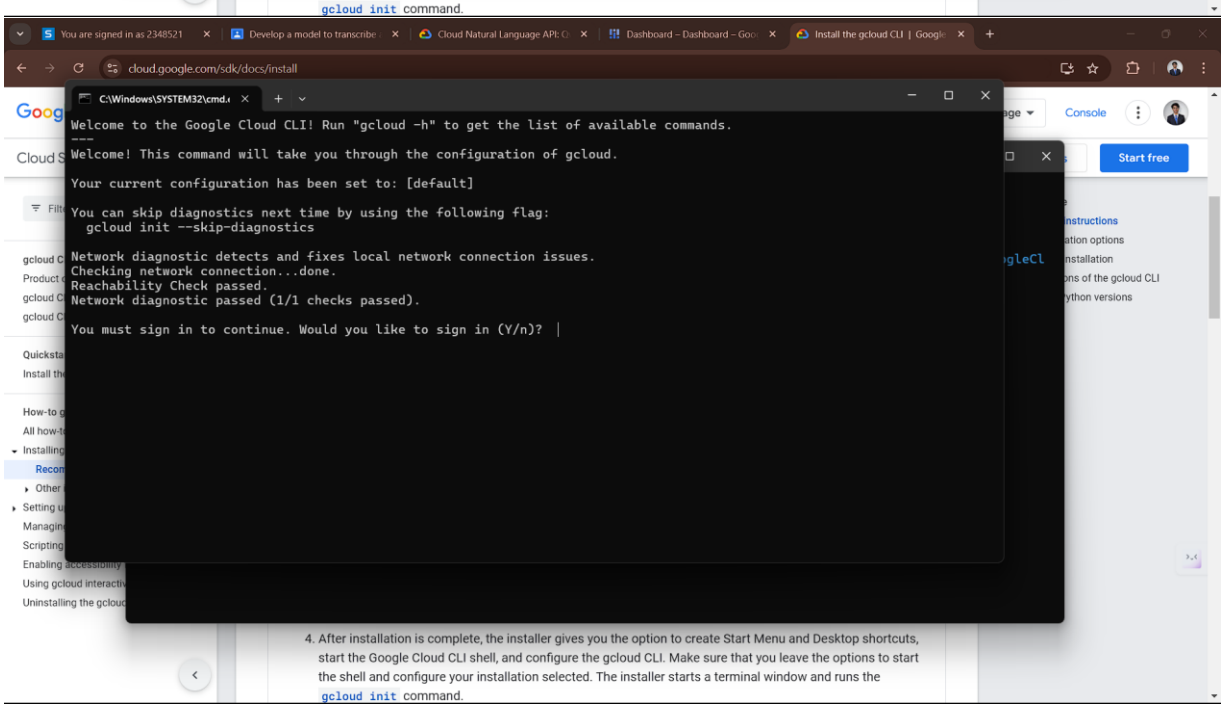
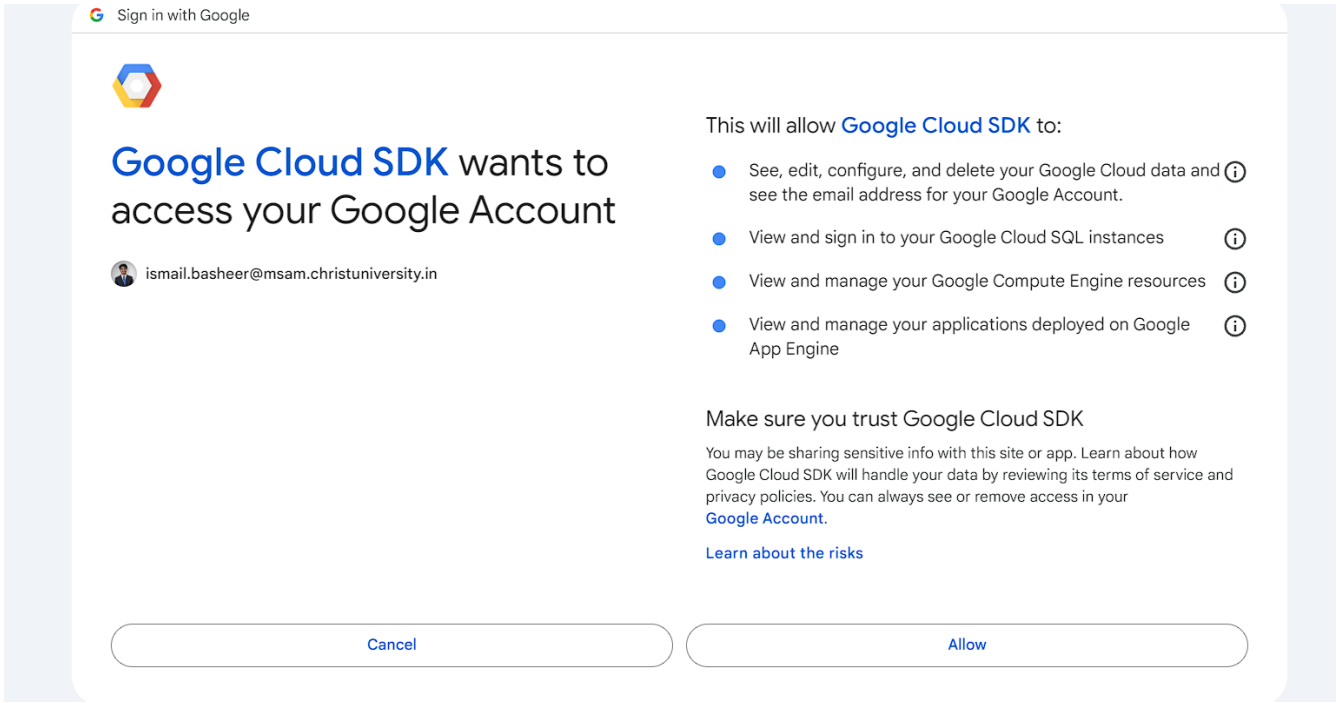
Installing the Google SDK CLI in the local machine powershell







Sign in with Google
Google Cloud SDK wants to access your Google Account
ismail.basheer@msam.christuniversity.in
This will allow Google Cloud SDK to:
See, edit, configure, and delete your Google Cloud data and see the email address for your Google Account.
View and sign in to your Google Cloud SQL instances
View and manage your Google Compute Engine resources
View and manage your applications deployed on Google App Engine
Make sure you trust Google Cloud SDK
You may be sharing sensitive info with this site or app. Learn about how Google Cloud SDK will handle your data by reviewing its terms of service and privacy policies. You can always see or remove access in your Google Account.

Service accounts for project "My Project 2348521"
A service account represents a Google Cloud service identity, such as code running on Compute Engine VMs, App Engine apps, or systems running outside Google. Learn more about service accounts.
Organization policies can be used to secure service accounts and block risky service account features, such as automatic IAM Grants, key creation/upload, or the creation of service accounts entirely. Learn more about service account organization policies.

C:\Windows\SYSTEM32\cmd.
Please make sure to create the project [12345678] using
$ gcloud projects create 12345678
or change to another project using
$ gcloud config set project <PROJECT ID>
The Google Cloud CLI is configured and ready to use!
* Commands that require authentication will use ismail.basheer@msam.christuniversity.in by default
Run `gcloud help config` to learn how to change individual settings
This gcloud configuration is called [default]. You can create additional configurations if you work with multiple accoun
ts and/or projects.
Run `gcloud topic configurations` to learn more.
Some things to try next:
* Run `gcloud --help` to see the Cloud Platform services you can interact with. And run `gcloud help COMMAND` to get hel
p on any gcloud command.
* Run `gcloud topic --help` to learn about advanced features of the CLI like arg files and output formatting
* Run `gcloud cheat-sheet` to see a roster of go-to `gcloud` commands.

the stale smell of old beer lingers
it takes heat to bring out the odor
a cold dip restores health and zest a salt pickle tastes fine with ham tacos al pastor are my favorite a zestful food is the hot cross bun
